ABSTRACT OF THE DISCLOSURE

To provide a ~~contents~~content acquiring device, a ~~contents~~content acquiring method, a ~~contents~~content server and a ~~contents~~content acquiring system which can minimize an acquisition request for ~~contents~~content data and can acquire ~~contents~~content data having a current version ~~as much as possible~~. By using a ~~valid term~~validity term previously held by the ~~contents~~content acquiring device or a ~~valid term~~validity term of the ~~contents~~content associated ~~added~~ during ~~contents~~content acquisition, it is previously decided in the device whether or not the ~~contents~~content are to be updated ~~or not~~, thereby transmitting an acquisition request through a network to ~~be an~~ access ~~to~~ a ~~contents~~content server ~~for storing contents data requested to be acquired through a network infra~~.

ABSTRACT OF THE DISCLOSURE

To provide a content acquiring device, a content
acquiring method, a content server and a content acquiring
5   system which can minimize an acquisition request for content
data and can acquire content data having a current version as
much as possible.   By using a validity term previously held
by the content acquiring device or a validity term of the
content added during content acquisition, it is previously
10   decided in the device whether the content are to be updated or
not, thereby transmitting an acquisition request to be an
access to a content server for storing content data requested
to be acquired through a network.
